DRINK WATER TO AVOID SICKNESS, SAYS AUTHORITY

Glass of Hot Water Before Breakfast Daily Keeps the Doctor Away.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its untiring research is the recommendation that it is as necessary to attend to internal sanitation of the drainage system of the human body as it is to the drains of the house.

Those of us who are accustomed to feel dull and heavy when we arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the phosphated hot water is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble, rheumatic stiffness; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from the drug store. This will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.—Advertisement.

RAILWAY SWITCH TO BE ORDERED TO POINT WEST IN THE CANYON

City Fathers Give Company Thirty Days in Which to Move Switch. License Ordinance Remains the Same.

Thirty days time was given the Warren Bisbee Railway Company, yesterday in full meeting of the city council to change the present location of the switch to a point between the Masonic building and the Doyle house. The council also, after considerable argument, decided to allow the real estate license ordinance of 1912 to stand without amendment.

Besides a considerable amount of routine work and the presentation of complaints, the council managed to dispense with, at least temporarily, two pressing matters. Each subject, however, was argued at length and resulted in hot shots from both sides to both controversies.

The matter of changing the street car switch again brought up the so-called jealousy between Brewery Gulch and Main Street. Each side blamed the other for something indefinite in wanting the switch either retained where it is or for the changing of it. After an hour of more had been spent, discussing the matter, it was decided that the company would have to move it further up the canyon. The other matter handled was that of real estate dealers' licenses and resulted in a victory for those who favor taxing the out-of-the-state land agent more than the sum assessed against the local men.

By the ordinance of 1912 real estate dealers, handling land or property in Cochise county, must pay a license of \$15 per quarter. The same ordinance specified that dealers handling state property, but outside of the county, should pay a quarterly license of \$30 and those who sold property outside of the state of Arizona should pay \$75 a quarter.

Both of the last two sections of the ordinance, however, have been practically dead letters for several years. The matter was brought to the attention of the council after City Collector James Allison, made an effort to collect on the basis, provided for in the ordinance. The real estate men brought it before the council.

The great difficulty, as vouched for by the City Marshal, is that the majority of people selling out of the state lands do so from curbstone. They are hard to locate, and a considerable number get under the wire without paying any license fee whatever. Those who are willing to pay the fee, however, asked that they be placed on the same basis as the local man. This the local dealers objected to.

The subject was argued pro and con in the council and a motion offered by Councilman Charles Cunningham to the effect that the license fees of the out-of-the-state dealers be charged the same license as the home dealer was lost by one vote. The City Marshal was ordered to proceed along the lines as proscribed in the ordinance of 1912. It is understood that several of the companies, which are represented here will fight the ordinance and some interesting legal actions are anticipated as a result of the council's action.

PRaised BY MRS. FRENCH.

Those who have traveled extensively always appreciate and praise the Burton Holmes Travelogues because of his ability to make their own journeys much more interesting and valuable. Mrs. S. W. French of Douglas, writes: "Although my present book space is much overcrowded, I could not resist the fascinations of the Travelogues, and I have decided to make room for them at the expense of other things. I have never before seen a set of books which proved on delivery to be as satisfactory as the sample, and I have found among the pages much information of great interest about places abroad in which I have lived and thought I knew thoroughly. Whether one travels or remains at home, these Travelogues are equally valuable and interesting."

SEEK AID OF MINERS IN PROMOTING PARK PROJECT TO FINISH

Copper Queen Grants Permission to City Council to Request Contributions Necessary for Completing Plans.

In order to carry out the plans which have been prepared for the city park, it has been found necessary to raise a greater sum than has been already secured by contributions. Permission has therefore been secured from the Copper Queen Consolidated Mining company for a committee to visit employees, and secure their names to a subscription for the additional funds required. As all will share in the benefits of the park, a great number of subscriptions are to be desired and large subscriptions would not be needed. It is hoped and expected that many individuals will wish to subscribe small amounts, say the equivalent of a sack of cement, toward the completion of the work which has been so well begun and which means so much to the district.

The miners will be visited during the coming week for this purpose by a committee composed of two members of the city council, who have done so much to make this public improvement possible, and others who will undoubtedly volunteer their services.

Although the space available is not as great as could be desired, the plans have been made, with the assistance of a landscape gardener, to make the best possible use of it. It will be a garden in this country, where so little is fresh and green, and the broad surface for dancing will supply a real need for an open air amusement natural to everyone and so appropriate to this climate.

L. SAWAYA OPENS IN UNCLE SAM'S STORE

Main Street Establishment is Stocked with Splendid Rugs, Laces and Jewelry.

L. Sawaya has opened for business in Uncle Sam's store on Main street. Sawaya is carrying as fine an assortment of antique and Oriental rugs, Irish laces, table cloths, Mosaic jewelry, etc., as one would find in an inspection of any store in the whole state of Arizona. In fact, Sawaya is recently from Los Angeles where he was in direct contact with the best conceptions of the masters of his line. More recently, Sawaya was located in the Smelter City, coming to Bisbee from there. His business proved a decidedly prosperous undertaking in Douglas, so it is evident that his goods bore the test of patronage and use by a large number of discriminating residents of the Smelter City.

A visit to Sawaya's establishment yesterday, disclosed the fact that his array of rugs, laces, jewelry, etc., is an impressive one and thoroughly worthy the examination of persons of critical judgement concerning values in goods of the nature of those in which Sawaya specializes.

IT'S ARBOR DAY IN VALENTINE STATE

High School Students to Plant Trees; General Lessons of Conservation.

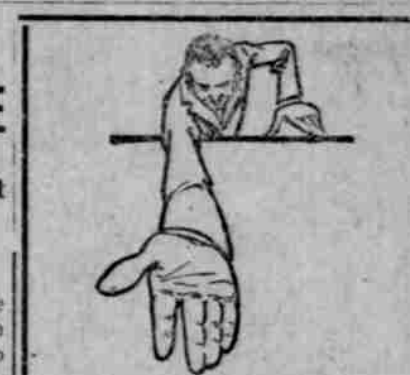

Today is Arbor Day in the Valentine State. That fact doesn't mean as much to the Warren District as it does to many other sections of Arizona. However, a considerable number of trees will be planted and improvements and general renovations made in private and public lots. Banks will be closed throughout the day. The postoffice will observe holiday hours. Stamp and general delivery windows will be open from 9 to 10 a. m., all other departments closed throughout the day.

The schools will be open according to usual schedule but, at the high school, trees and vines will be planted and a general "cleaning up" take place. Most of the schools are so located that it wouldn't be much use to attempt anything in the hope of producing foliage to shelter future generations from the summer sun of the Southwest. However, the spirit of the day, which virtually is one of conservation and development of natural resources, will be inculcated in the minds of the pupils.
